

Machine Control Integration

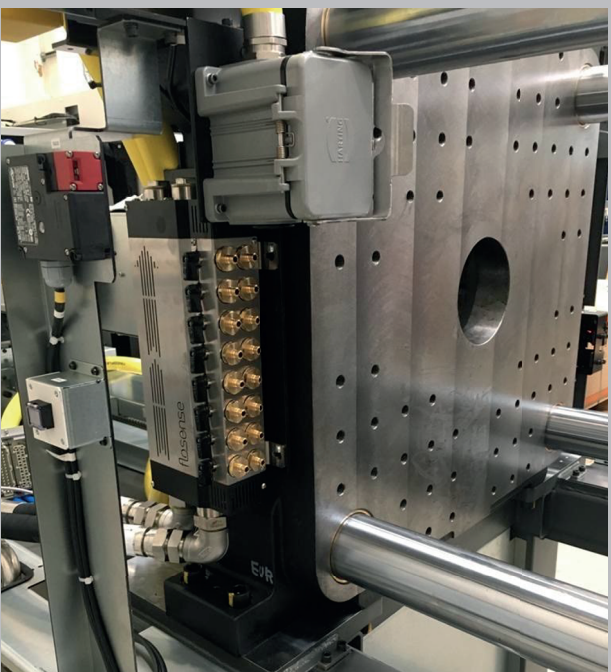

Flosense installed on the Fanuc Machine Control.
The integration is made using VNC technology allowing to operate the full Flosense GUI directly on the Fanuc Touch Control.

Extra Touch Control

Flosense is designed to operate with an extra touch screen on non-operator side of easy acces when controlling cooling lines installed remotely.

Compact Manifolds

The Flosense manifolds are very compact and will fit perfectly on all size machines.

The integrated double action valves are accessible for easy control.
