

## HOT RUNNER CONTROLLER

The advanced modules which include current monitoring as standard have the following features:

- Dehumidifying Soft Start
- Triple-line LED display
- Auto / Manual Output Function
- PID Auto Tune Temperature Control
- Max Current Output 15A
- Current Measurement Display
- Power Output Percentage Display
- Thermocouple J/K Type
- Temperature scale °F/°C Switchable
- Selectable Alarm Modes
- 380-400VAC/3Phase/N/Earth
- CE Marked
- Supplied Complete with 3m Cable Set
- Phase Angle Output Mode
- Zero Cross output Mode
- Fuse Failure Indicator
- Heater Break Detection
- Power Frequency Auto-Detection (50/60Hz)
- Thermocouple Failure Detection
- Thermocouple Reverse Detection
- Current Monitoring Display
- Alarm Output Option
- RS485 Output Option

**Wiring Connector Assignment example (24 x 1)**

HT = Heater  
TC = Thermocouple
